**The World's First
Tokenized Ship**

MARITIME DAO ECOSYSTEM

CEO Newsletter — #1 2026

Captain Gints Adams · February 2026

On behalf of all team I hope 2026 has been a good start for something big and motivational for you all. Our Digi Creative Investors, LOTOSS purchase investors, LOTOSS Token Owners, and participants in Maritime DAO, RWAMarketplace, ShipCheckAI, and MaritimeStockPhotos.

We sincerely wish you health, strength, and a prosperous 2026.

But before the updates, a word that matters most to me:

Thank you.

Projects like this require time, passion, knowledge, patience, and genuine hard work — from our entire team and from each of you. Your trust and participation make it

real. I do not take that lightly.

2025: The Year It Became Real

2025 was a turning point. Not just for our project — but for the maritime industry.

One fact stands above everything else:

We purchased our first seagoing vessel, LOTOSS — now the world's first tokenized maritime asset.

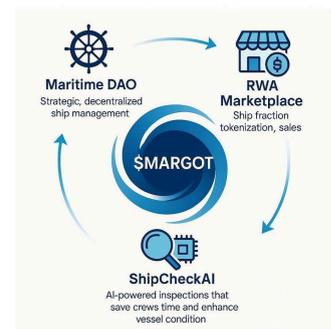

From the outside, this might look like 'just one ship.' But inside our vision, it is the proof point — the moment that confirms what we are building is real, expandable, and capable of long-term value for all of us.

What We Are Building — Together

Our ecosystem is five interconnected parts, each reinforcing the others:

- RWAMarketplace — the tokenization and ownership platform for maritime assets

- LOTOSS — the first real-world vessel proving the model works
- ShipCheckAI — AI inspection tools that protect vessel performance and profitability
- Maritime DAO — the governance layer where the community proposes, votes, and directs
- \$MARGOT — the internal economic unit connecting participation to long-term value

None of these work alone. All of them grow stronger together.

Where We Are Now

LOTOSS — THE WORLD'S FIRST TOKENIZED SHIP

LOTOSS is purchased and operational. A dry dock is planned for Spring 2026, after which it begins full commercial activity. There are only 403 LOTOSS tokens in existence. We cannot make more. When this project reaches the global stage, each unique token has the potential to be worth significantly more than its original entry price.

RWAMARKETPLACE

The marketplace is established and functioning. LOTOSS tokens are on sale. A cement carrier tokenization is in final agreement, and an offshore wind vessel is in the next planning phase. The pipeline is real and growing.

 <p>EXPECTED RETURN 15% p.a.</p> <p>PROJECT MANAGER Maritime DAO</p> <p>ASSET VALUE INCREASE AFTER DRY DOCK 100% after dry dock</p> <p>TOKENS ISSUED 403</p> <p>SHIP'S DETAILS</p>	 <p>EXPECTED RETURN 11% p.a.</p> <p>PROJECT MANAGER Maritime DAO</p> <p>CHARTER 1 year charter signed</p> <p>TOKENS TO BE ISSUED 18'282</p> <p>SHIP'S DETAILS</p>	 <p>EXPECTED RETURN 15-25% p.a.</p> <p>PROJECT MANAGER Maritime DAO</p> <p>CHARTER TBC</p> <p>TOKENS PLANNED 5'000</p> <p>SHIP'S DETAILS</p>

Current and upcoming vessels available on RWAMarketplace

SHIPCHECKAI — RAISING STANDARDS, PROTECTING RETURNS

ShipCheckAI is an AI-powered platform built to keep ships above industry standards, reduce operational risk, and improve performance — which means stronger, more sustainable profits over time.

How it works: A crew member takes a photo on board and uploads it to our system. The AI analyses it against maritime regulations in approximately 5 seconds and returns a traffic-light report — Green (all clear), Yellow or Red (requires attention). Simple. Fast. Reliable.

ShipCheckAI platform interface

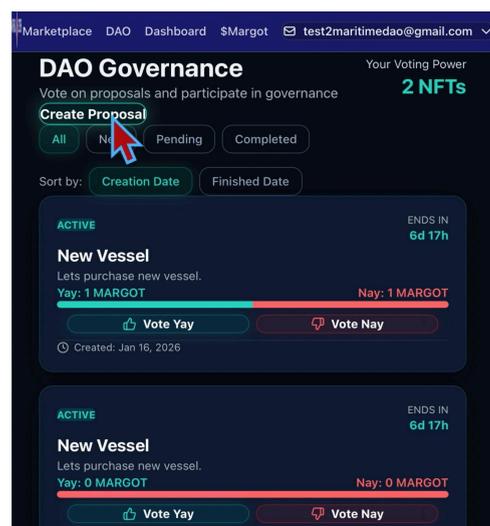

MARITIME DAO — YOUR OPERATING SYSTEM

This is the platform where the full ecosystem runs. Our goal is a '3-click' system — anyone can participate without needing blockchain knowledge.

- Join using only an email address — no blockchain expertise required
- Purchase, manage, and resell ship parts in a secondary market
- Propose and vote as a full member of ecosystem governance

The DAO is currently in active testing. We ask everyone involved to participate — your engagement directly strengthens the platform before full release.

See how it works: youtube.com/shorts/0CdZ9LrZWuQ

Plans for 2026

Q1 2026 — MARITIME DAO FULL RELEASE

We plan to complete and fully release the DAO platform in Q1 2026.

LOTOSS TOKEN MIGRATION

LOTOSS token certificates will migrate into the DAO platform. You will be asked to register there, where you will see your tokens clearly in your account — and when enabled, sell them on the secondary market.

SHIPCHECKAI — INVESTOR EXPANSION

ShipCheckAI is ready for investor attention. The next step is building five interdependent inspection tools to strengthen compliance, performance, and reliability across the fleet.

\$MARGOT — THE MARITIME GOVERNANCE TOKEN

Think of \$MARGOT as an internal monetary unit with a different logic than traditional currencies. Inflation quietly erodes purchasing power over time. Our plan: connect \$MARGOT to real value drivers such as gold, BTC, oil, and gas.

Participants aim to benefit from two sources: the operational profits generated by our ships, and the growing strength of \$MARGOT as the ecosystem expands.

A Word on Tokenization

Tokenization means that people can own verified, tradeable parts of assets that were previously inaccessible — enabled by blockchain technology. This is not a distant concept. It is becoming a serious term in global finance.

Maritime is one of the last major industries to modernize ownership access. We are building the infrastructure that makes this possible.

LEGAL FOUNDATION

In 2025, we achieved a major legal milestone: the foundation is in place to grow efficiently up to EUR 1 million without requiring a license at this stage. We maintain clear disclaimers to ensure all participants are informed of relevant risks.

Full details: rwamarket.place/privacy-policy-2/

Once we outgrow this size, we already have a plan — either obtain the required license, or cooperate with an already-licensed partner.

Closing

I know this letter is long. That is exactly why our team invests so much time making the final product simple, intuitive, and accessible. We are not fully there yet — but we can see the light at the end of the tunnel.

The same as you, we want to feel safe, do good work, and achieve results that matter — not just for ourselves, but for those who come after us.

Let 2026 be fruitful, healthy, and genuinely worthwhile for all of us.

Sincerely,

Captain Gints Adams

CEO, Maritime DAO Ecosystem

Special thanks to the whole team as well to the people who have been involved in the process building the future of maritime: Kristiāns Kallings, Artūrs Bernovskis, Edgars Razmus, Igor Stojanovic, Alex Kadyrov.

Our Maritime DAO logo is inspired by Morse Code C-Charlie — Affirmative, YES. Together with you, we say YES to innovation, YES to knowledge, YES to smart and efficient work, YES to transparency, and YES to fair, equal participation.
